1948 INVESTMENT PLAN OF THE CENTRAL  
ADMINISTRATION OF THE CHEMICAL INDUSTRY

## 1. Introduction

a. Ratio of the Zloty

The Ministry of Trade, the Ministry of Finance, and the Central Planning Office (CUP) have established a ratio of 50 to 1 as the value of the Polish Zloty for production and investment calculations. This ratio is based on the year 1937, when the exchange rate was 1 to 25 zloty. In accordance with this decision, the amount of 5,563,058,000 zloty foreseen as investment for the Central Administration of Chemical Industry for 1948 represents 111,261,160 zloty or 4,450,500 at the 1937 value and rate of exchange. This ratio applies to industry and building only (cheap labor) and it is much higher for such items as food and unrationed clothing. It is, for example, 180 to 1 for sugar and 700 to 1 for leather.

b. Types of Investments

Investments are divided into "Home Investments" and "Investments for Imports". All business transactions among factories and other establishments are made in bills of exchange. Currency is used for workers' wages and the purchase of goods from free markets for workers' canteens. Credits for "Investments for Imports" are based on the 1948 rate of exchange.
